

SPARK STEM FEST

Bring Your Students to Spark STEM Fest School Field Trip Day!

Friday, February 12, 2027

Join us for an unforgettable educational adventure at Spark STEM Fest! School Field Trip Day focuses exclusively on school students with engaging hands-on exhibits and demonstrations led by STEM professionals in a classroom environment to inspire students to envision themselves in roles they may have never imagined. Students of all ages will be enthralled by the BubbleMania: Science, Art & Comedy Show! This show combines spectacular bubble illusions with engaging STEM learning as students discover how bubbles form, why they're spherical, how to make a cube bubble and the science of bubble bursting - each topic related to the physical laws of the natural world. Older grades learn to appreciate practical applications of diverse bubbles in everyday life (soccer balls to air bags) and are actively involved in fun demonstrations of molecular bonding and surface tension.

What to Expect:

- Interactive Classroom Activities with STEM Experts for Grades 3-12
- Hands-on Exhibits and Engaging Demonstrations
- BubbleMania: Science, Art & Comedy Show! with Casey Carle

How to Book a Field Trip: Contact Reservations at classes@osc.org or 407.514.2112 to schedule your visit. Don't miss out on this incredible opportunity to inspire and educate your students!

Help Spread the Word: Teachers, share this flyer with your colleagues and school community. Let's make Spark STEM Fest a memorable experience for all!
