

Dear Caregivers,

It is a pleasure to welcome your child to the Orlando Science Center's Summer Camps and Ready? Set? Create! for grades 3-4. This week will be incredibly fun-filled and provide your child with a variety of hands-on, exploratory learning experiences. In order to help you discuss with your child what he or she has seen and done each day, we would like to give you an overview of the camp for this week.

Sincerely,

OSC Summer Camp Staff

Ready? Set? Create! – Peek at the Week

“With imagination as your guide, campers will design, test, and build their own creations! Explore the Hive Exhibit and learn what being a maker or inventor is all about with projects like wearable technology and 3Doodler creations.”

Monday – Maker Madness: Campers will begin to turn their classroom into their very own makerspace and learn how makers turn their designs into reality. Using newfound skills and technology, they'll finger knit their own creations and construct squishy circuits!

Tuesday – 3D Printing: Harness the power of 3D printing by learning how to create 3D objects using Tinkercad design software. Campers will later 3Doodle their own imaginative creations and learn how 3D printers work!

Wednesday – Cardboard Arcade: Gear up for a fun game filled day, as campers will create their own cardboard arcade! After creating fun cardboard pinball machines, campers will add their own twists and turns with the Makey Makey invention kit.

Thursday – Wearable Tech: Wander through a day of wearable technology where campers will learn the inner workings of circuits and create one on paper! Campers will also create their own circuit that they can wear.

Friday – Mini Makers: Campers will prepare for their most fun-filled day yet, as they prepare to hold their own Maker Expo! Come stop by to see all of their creative and awesome maker projects they've worked on throughout the week!
