

# STEM Day

## at the Capitol

**Tuesday, April 16, 2019**

**10:00 a.m. – 3:00 p.m.**

STEM Day at the Capitol is your chance to discover the important role science centers and museums play in facilitating STEM (Science, Technology, Engineering and Math) education, which is helping to build tomorrow's technology workforce. Science Centers like MODS, MOSH, MOSI, Orlando Science Center, and the Phillip and Patricia Frost Museum of Science are lighting the spark of curiosity, promoting STEM careers and instilling important 21st Century skills through iconic learning experiences. Please join us for hands-on activities and learn how youth are being inspired by science centers and museums from across the state.
