

Dear Caregivers,

It is a pleasure to welcome your child to the Orlando Science Center's Summer Camps and *Superhero Science* for grades 3-4. This week will be incredibly fun-filled and provide your child with a variety of hands-on, exploratory learning experiences. In order to help you discuss with your child what he or she has seen and done each day, we would like to give you an overview of the camp for this week.

Sincerely,

OSC Summer Camp Staff

Superhero Science – Peek at the Week

Push yourself to soar higher, go further, and be faster as we plunge into the science behind your favorite super heroes! Harness the power of the elements, master magnetism, and race to super speeds while working as a team to overcome obstacles. It's the science behind super powers!

Monday – Marvel Madness: Become a master of the Marvel Universe and use science to recreate the powers of Spiderman, explore super speeds by testing your reflexes with Black Panther, and create earthquakes with the hero Quake. Your hero in training will start their week with a bang as they learn that with great science, comes great fun!

Tuesday – DC Dynamos: Unlock the power of your favorite DC heroes in a day packed with super science! Design new tech with Robin and Bat Girl, and master magnetism to move objects without touching them like Miss Martian.

Wednesday – Brand New Heroes: From Steven Universe to Voltron, there are endless brand new heroes to explore! Your hero in training will learn about the science behind modern heroes, control the chemistry that powers the Powerpuff Girls, and work as a team to build tech with Voltron.

Thursday – Video Game Heroes: Campers will move out of the comics and into the game systems, as they explore the worlds of computer engineering and use coding software to make their own video game heroes.

Friday – Heroes Journey: Campers will complete their hero training by exploring real life heroes who save people every day. Campers will get to work with solar technology and learn how engineers help people harness and overcome the elements of nature! Campers will then take their knowledge and create their own original superhero comic.
